静耐管道  
JING NAI GUAN DAO

Rubber flexible joint  
Shock absorber  
Compensator series

橡胶软接头、减震器、补偿器系列

南京静耐管道设备有限公司  
NANJING JINGNAI PIPELINE EQUIPMENT CO., LTD

## Brief Introduction

### 企业简介

南京静耐管道设备有限公司是一家专业生产、销售可曲挠橡胶接头、金属软管、补偿器、伸缩接头、减震器以及各种管道设备的企业，我公司具有一支经验丰富，精干和科研管理的生产队伍，拥有先进的生产设备和完善的检测仪器。

公司生产的系列产品严格按照国家标准和国外先进标准设计、生产、检验，产品技术指标均达到国内领先水平，产品具有设计先进，结构合理，体积轻巧，装卸方便等特点。广泛应用于石油、化工、钢铁、冶金、机械、交通、船舶、码头、建筑、造纸、电力等行业，产品以其稳定性、可靠性深受用户的好评与信赖。

公司自成立以来，坚持高起点、高质量、高标准的服务原则；并一贯坚持质量第一、用户至上、争创名牌的战略，利用先进的设备与先进的检测手段、多年的生产丰富经验为用户创造尽善尽美的产品。我们将真诚融入承诺、责任、信念之中，与每一位客户真诚相伴，集聚一流资源，实现合作共赢，创建一流品牌，实现共同辉煌。

## BRAND OUTSTANDING COMES FROM QUALITY

### 品牌源自卓越品质

Nanjing Jingnai Pipeline Equipment Co., Ltd. is an enterprise specializing in producing and selling flexible rubber joints, metal hoses, compensators, expansion joints, shock absorbers and various pipeline equipment. Our company has an experienced, capable and scientific research management production team, advanced production equipment and perfect testing instruments.

The series of products produced by the company are designed, produced and tested in strict accordance with national standards and advanced foreign standards, and the technical indicators of the products have reached the leading level in China. The products have the characteristics of advanced design, reasonable structure, light volume and convenient loading and unloading. Widely used in petroleum, chemical industry, steel, metallurgy, machinery, transportation, ships, docks, construction, paper making, electric power and other industries, the products are highly praised and trusted by users for their stability and reliability.

Since its establishment, the company has adhered to the service principle of high starting point, high quality and high standard; And always adhere to the strategy of quality first, customer first and striving for famous brands, and create perfect products for users by using advanced equipment and advanced testing methods and years of rich experience in production. We will be sincerely integrated into the commitment, responsibility and belief, and sincerely accompany every customer, gather first-class resources, achieve win-win cooperation, create first-class brands and achieve common glory.

创新、执着、诚信、协作!  
Innovation Persistence Integrity Cooperation

## 产品目录

### 橡胶接头系列 RUBBER JOINT SERIES

橡胶接头安装说明 Rubber Joint Installation Instructions	02
橡胶接头连接法兰说明 Rubber Joint Connecting Flange	03
KXT 型可曲挠橡胶接头 KXT Type Flexible Rubber Joint	04
KST-F 型可曲挠双球橡胶接头 KST-F Type In A Flexible Rubber Joint Double Sphere	05
KYT 型可曲挠同心异径橡胶接头 KYT Type In A Flexible Concentric Reducer Rubber Head	06
JIS 5K 10K 日标可曲挠橡胶接头 JIS 5K 10K Standard In A Flexible Rubber Joint	07
150bar 美标可曲挠橡胶接头 150 bar Beautiful Mark In A Flexible Rubber Joint	08
KPT 型可曲挠偏心异径橡胶接头 KPT Type Can Be Qu Torsion Eccentric Reducing Rubber Joint	09
KKT 型卡箍式可曲挠橡胶接头 KKT Type Clamp Can Be Flexible Rubber Joint	10
KWT 型可曲挠橡胶弯头 KWT Type In A Flexible Rubber Pipe Bend	11
KST-L 型丝扣双球体橡胶接头 KST-L Thread Double Sphere Rubber Joint	12
KDT 型翻边橡胶接头 KDT Flanging Rubber Joint	13

### 金属软管/补偿器系列 METAL HOSE/SERIES COMPENSATOR

JTW 型金属软管 JTW Type Metal Hose	15
JDZ 型通用波纹管 JDZ-type General Corrugated Pipe	16
VSSJAF[C2F] 型双法兰松套传力接头 VSSJAF[C2F] Double Flange Power Delivery Joint	17
VSSJA-2[B2F] 型双法兰松套限位伸缩接头 VSSJA-2[B2F] Double Flange Limited Telescope Joint	18
AF[VSSJA] 型法兰式松套伸缩接头 AF[VSSJA] Flange-Sleeve Telescope Joint	19
CC2F[VSSJAFG] 型可拆式双法兰传力接头 CC2F[VSSJAFG] Dismantling Double Flange Transmission Joint	21
QJB 型球形补偿器 QJB Spherical Compensator	22
ZBY 直埋外压式轴向波纹补偿器 Buried Outside Pressure Type Axial Corrugated Compensator	23
柔性刚性防水套管 Flexible Rigid Waterproofing Casing	24
人防电气穿墙管 Man-defense electric through the wall pipe	25

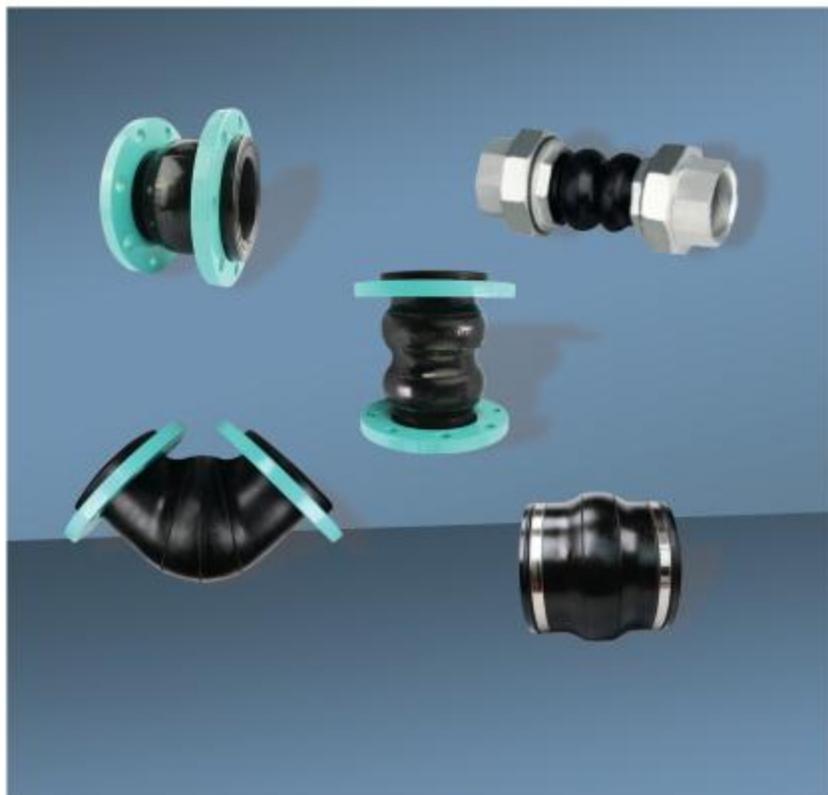

### 减震器系列 SHOCK ABSORBER SERIES

JSD 型低频橡胶隔震器 JSD Low-frequency Rubber Vibration Isolator	27
BE 型橡胶隔震器 BE Type Rubber Vibration Isolator	28
ZD 型阻尼弹簧减震器 ZD Type Damping Spring Shock Absorber	29
ZTF 型可调阻尼式弹簧减震器 ZTF Adjustable Damping Type Spring Shock Absorbers	30
HV 型阻尼弹簧吊式减震器 Damping Spring Suspension Shock Absorber	31
ZTY 型吊式弹簧减震器 ZTY Type Hanging Spring Shock Absorbers	32
JB 型低频可调阻尼弹簧减震器 JB Type Low Frequency Adjustable Shock Absorber Damping Spring	33
ZGT 型阻尼弹簧减振(震)器 ZGT Damping Spring Vibration (shock)	34
法兰执行标准 Flange implementation standard	35

# RUBBER JOINT SERIES

## 橡胶接头系列

## 橡胶接头安装说明 Rubber Joint Installation Instructions

### 安装橡胶防震接头注意:

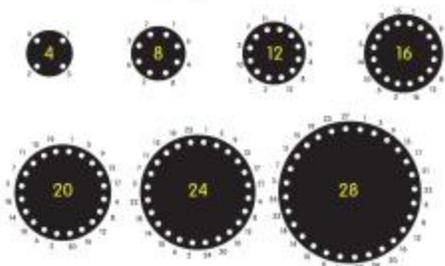

1. 橡胶接头应按产品自然长度安装, 严禁超位移极限安装。
2. 管道必须有固定支架或托架支撑, 橡胶接头两端都要有固定支架, 支架和橡胶接头离得越近越好。
3. 管道固定支架的力必须大于轴向力, 不能让接头承受管道自身重量和轴向力。
4. 请在产品允许值范围内安装, 位移和偏移超出范围会导致橡胶接头漏水、拉脱。
5. 螺栓应对角逐步拧紧, 过度拧紧会损坏密封面。
6. 管道压力或震动过大, 温度过高或固定支架不可靠时应加装防拉脱装置, 避免管道位移或震动导致橡胶接头拉脱或漏水。
7. 产品应在允许的温度、压力和介质范围内使用。
8. 与橡胶接头对接的管道法兰应采用碳钢专用法兰, 以保证可靠接触良好, 法兰上的防锈机油要擦净, 防止腐蚀橡胶接头。管道法兰和管道焊接完毕冷却后才能安装接头, 严禁管道法兰和橡胶接头先连接再焊接管道, 会高温灼伤橡胶接头。
9. 螺栓连接的橡胶接头在安装时, 两端活接头禁止互换, 按原套安装, 安装时力度不能过大, 否则可能引起产品的泄露和损坏。

### Installation Of Rubber And Shock Proof Joints:

1. The rubber joint shall be installed to natural products according to length and ultra displacement limit installation shall be strictly prohibited.
2. The pipe must have a fixed bracket or bracket, rubber joint at both ends to a fixed bracket, bracket and rubber joint is close to the more the better.
3. The pipe fixed stent force must be greater than the axial force, cannot make joint pipe under its own weight and axial force.
4. Please install in the product value scope displacement and deflection is beyond range can lead to rubber joint leakage, pulled off.
5. Bolts should be diagonal gradually tight, too tight will damage the sealing surface.
6. Pipe pressure or vibration is too large, high temperature or fixed bracket should be equipped with unreliable pulled off device, avoid pipeline displacement or vibration cause rubber joint pulled off or leak.
7. Products should be in the allowed range of temperature, pressure and media use.
8. Docking with the rubber joint of the pipe flange should use special flange butterfly valve to ensure the sealing surface contact is good, the anti-rust oil on the flange to polishing the net, to prevent corrosion of rubber joints, pipe flanges and pipe welding and cooling ability after completion of installation joint, it is strictly prohibited to pipe flange and rubber joint connection first, then welded pipe, high temperature will burn rubber joint.
9. Rubber joint of threaded connection when installation, on both ends of the union banned swaps, according to the original set of installation, the installation strength cannot too much, otherwise may cause leak and damage of the product.

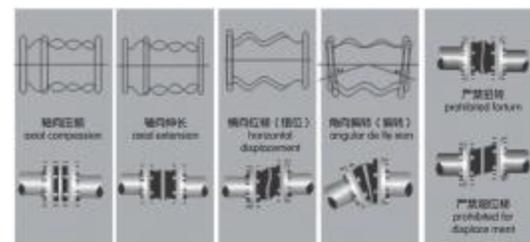

### 应对立逐渐拧紧螺帽/螺栓, 按下列顺序操作

Tighten Opposing Nuts/bolts Gradually According To The Following Sequence

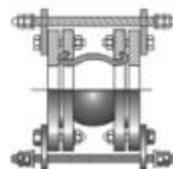

### 可曲挠橡胶接头位移情况示意图

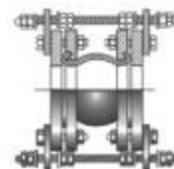

Displacement Chart Of Flexible Rubber Joint

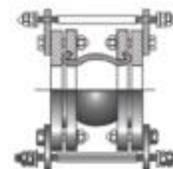

### 防拉脱装置图 Pulled Off Device

方式一 First Method

方式二 Second Method

方式三 Third Method

### 橡胶接头连接法兰说明 Rubber Joint Connecting Flange

请选择正确的法兰 Please choose The Right Flange

A. 采用正确的配套法兰防止损坏橡胶密封面  
Flanges with correct ID hole prevent damage to rubber

法兰不能与橡胶密封面完全密封, 损坏橡胶密封面。  
Insure mating flange I.D. is flush with rubber

B. 采用正确的焊接法兰防止损坏橡胶密封面  
Weld neck flanges with correct ID prevent damage to rubber

钢管与平焊法兰不平齐对橡胶密封面造成损坏  
Steel pipe with flat welding flange uneven in the face of rubber sealing surface damage

C. 采用大口径内径平焊法兰时应安装一个小口径金属垫片可以防止损坏橡胶  
In case of B,D,F on additional metal gasket can be used to prevent damage to rubber

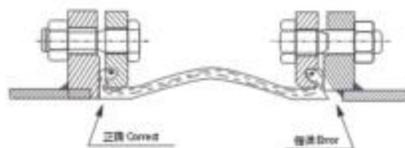

法兰内边缘损坏橡胶密封面  
Inner edge of flanges damages rubber

### 与橡胶接头连接的反向法兰应选择蝶阀专用法兰

- 橡胶接头本体的密封面是否受损取决于反向法兰的形状, 请参照上图及下图。
- 与橡胶接头连接的管道焊接反向法兰应选用蝶阀专用法兰(即小口径法兰)。
- 与橡胶接头连接的管道内径要与橡胶接头内径一致, 这样密封面才能更好的对接、密封。
- 与橡胶接头连接的反向法兰不要使用表面有凸起的法兰, 因凸起能和橡胶密封面的接触面积小, 导致单位面积符合增大, 密封面易受损。
- 与橡胶接头连接的反向法兰密封面要光滑平整不能有毛刺, 需和橡胶密封面紧密配合, 否则会有漏水、拉脱现象。

### With Reverse Rubber Joint Connection Flange Should Choose Special Flange Butterfly Valve

- Whether the sealing surface of rubber joint ontology easy damage depends on the shape of the reverse flange, please refer to the above and below.
- And rubber joint connection pipe welding reverse flange should choose special flange butterfly valve (i.e., small diameter flange).
- Connected with rubber joint of pipe diameter to the rubber joint diameter is consistent, in this way can we better docking, seal sealing surface.
- Reverse flange with rubber joint connections do not use surface is convex flange, because the bos and the rubber sealing surface contact area is small, which rusulted in increased load per unit area. Seal face easy damage.
- With reverse rubber joint connection flange sealing surface should be smooth level off there can be no burr, need to work closely and rubber seal face, otherwise there will be a leak, pulled off a phenomenon.

注明: 请按照安装说明安装使用橡胶接头产品, 如不当安装使用造成任何后果, 概不负责!

please follow the installation instructions to install use ruber joint product, such as improper installation using any consequences, is not responsible for!

450	18	200	16	25	22							

注: 我们厂于2002年根据用户的需求研制开发了卡箍式橡胶接头, 采用卡箍来代替法兰盘和螺栓, 使用时, 可方便地将卡箍式橡胶接头的两端分别套接在要连接的管道上, 通过不锈钢卡箍将橡胶接头与管道固定连接; 拆卸时松开卡箍即可。从而达到补偿管道因热胀冷缩, 输水所产生的位移量之目的。它与一般的橡胶接头相比, 有以下几个特点:  
1. 卡箍式橡胶接头节省了法兰盘和螺栓, 节约了工程的开支。  
2. 卡箍式橡胶接头管口处不需要翻边, 简化了工作的效率。  
3. 卡箍式橡胶接头简化了安装维修工作, 提高了工作效率。  
4. 卡箍采用不锈钢制作, 具有耐腐蚀等特点, 通径从DN50-500mm, 安装长度参照JGD(KST)-D执行或按照用户需要设计。  
5. 压力等级从0.25MPa-1.0MPa。

Note: in 2002, our factory according to the needs of users developed the clamp rubber joint, clamp is used instead of flange and bolt, when using, easily suit respectively in the two end of clamp rubber joint to connect line, through the stainless steel clamp to fix rubber joint and pipeline connection; Loosen the clamp when removed. Compensation pipeline due to the heat bilges cold shrink, so as to achieve the purpose of the water produced by the displacement. It is compared with the general rubber joint. Has the following features:  
1. Flange and bolt clamp rubber joint saved, save the expenditure of the project.  
2. Clamp rubber joint pipe mouth does not need flanging, simplify the work efficiency.  
3. The clamp rubber joint simplifies the installation and maintenance work, improve the work.

## KWT型可曲挠橡胶弯头

### KWT Type In A Flexible Rubber Pipe Bend

材料表 Material List

METAL HOSE/  
SERLES COMPENSATOR  
金属软管/补偿器系列

## JTW型金属软管 JTW Type Metal Hose

### 产品介绍 Product Introduction

JTW金属软管(简称软管)是现代工业管路中的一种高品质的柔性管道。它主要有波纹管、网套和接头组成。它的内管是具有螺旋形或环形的薄壁不锈钢波纹管,波纹管外层的网套,是由不锈钢或钢丝带按一定的参数编织而成。软管两端的接头或法兰是与客户管道的接头或法兰相配的。

波纹金属软管具有良好的柔软性、抗疲劳性、耐高低温、耐腐蚀性等诸多特性,它相对其他软管(橡胶、塑胶软管)的寿命就要高出许多,故它具有较高的综合经济效益。随着现代工业的发展,对耐高湿、耐高压的波纹金属软管的需求量是越来越大。

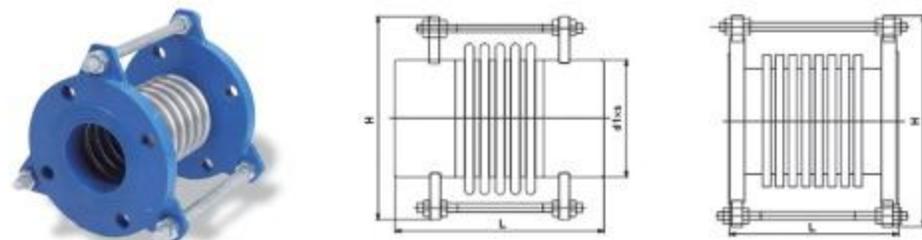

软管使用范围:需要充分挠性的输送管,防止振动处所配管,对蒸汽、煤气、空气、重油、石油、化工产品等均使用。

JTW-type metal hose(hose for short) is high-qualified flexible pipe among the modern industrial pipes. It is composed mainly of corrugated pipe, braid and joint. Its internal pipe is helical or circular thin-walled stainless steel corrugated pipe, and the braid covering the corrugated pipe is woven with stainless steel wire or steel belt according to specific parameters. The joints or flanges on both ends of the hose are matching the joints or flanges of customer's pipe. With good flexibility, fatigue resistance, high temperature resistance, high and low temperature resistance, corrosion resistance and other many features, corrugated flexible metal pipe has a longer service life than other hose (rubber or plastic hose), so it has high overall economic efficiency. With the development of modern industry, the demand for heat-resistant and high pressure-resistant corrugated flexible metal pipe will become larger and larger. Range of application: conveying pipe needing full flexibility, mating pipe for vibration prevention. And it also used in the industries of vapor, coal gas, air, heavy oil, petroleum and chemicals and so on.

Note: The size meets standard GB/T12465-2002.

法兰式松套伸缩接头：松套伸缩节安装在管道上后，拧紧螺母弹性密封圈，在螺母压盖的作用下相互斜度，紧压在管子外圈起密封和链接作用。当温度变化时管子能在接头中间自由的伸缩，当地基下沉，管子能偏斜，并确保密封无泄漏，从而起到自动补偿的目的。

Flange-type loose sleeve expansion joint: After the loose sleeve expansion joint is installed on the pipeline, tighten the elastic sealing ring of the nut, and under the action of nut gland, they are inclined to each other and tightly pressed against the outer ring of the pipe to play the role of sealing and linking. When the temperature changes, the pipe can freely expand and contract in the middle of the joint, and when the foundation sinks, the pipe can deflect, and the seal is ensured to be leak-free, thus achieving the purpose of automatic compensation.

注：本尺寸符合GB/T12465-2002标准 Note: The size meets standard GB/T12465-2002

可拆式双法兰传力接头 安装在管道上后，根据所需的伸缩距离进行限位，拧紧螺母，弹性密封圈在螺母压盖的作用下依靠相互斜度压紧在管子外圈起密封和连接作用，主要和管道阀门连接不但起到管道补偿作用，更方便了阀门的维修及更换。

Detachable double-flange force transmission joint: after being installed on the pipeline, it is limited according to the required telescopic distance, and the nut is tightened. The elastic sealing ring is tightly pressed on the outer ring of the pipe by mutual inclination under the action of nut gland, which plays a sealing and connecting role. The main connection with the pipeline valve not only plays a role in pipeline compensation, but also facilitates the maintenance and replacement of the valve.

## QJB型球型补偿器 QJB Spherical Compensator

### 性能特点 Features

球型补偿器主要适用于地面沉降大、震动大、地形复杂的管道连接，安装在管道上后，球体可以以回转中心在θ角范围内自由转动，来补偿管道因地基沉降、热胀冷缩引起的挠曲。具有补偿量大，占据空间小，流体阻力小，安装方便，综合成本低等优点。

Spherical Compensator mainly applied to the pipe connections with large land subsidence, vibrations and terrain complex, installed with the pipe, the sphere rotating freely in the center of the angle θ to compensate the deflection due to the foundation settlement and expansion and contraction. With a large amount of compensation, small in size, low fluid resistance, easy installation, and low comprehensive cost.

说明: 1、柔性防水套管一般适用于管道穿过墙壁之外受有震动或有严密防水要求的建筑物。2、套管穿墙处之墙壁,如遇非混凝土墙壁,应浇筑混凝土,范围应比翼环直径大200mm,而且必须将套管一次浇灌于墙内。3、表中DN尺寸和壁厚可根据用户需要生产,定货时请注明通径、管外径、壁厚。  
Description: 1, flexible water proofing casing generally applicable for pipe through the wall of vibration or have strict waterproof dem and buildings 2, casing wall in the wall in case of the concrete walls, a total of pouring concrete and the range should be colorful ring diam eter of 200mm, and the casing must be watering the fixed in the wall at a time 3, DN size and wall thickness in the table can produce according to the needs of users, with order

## 人防电气穿墙管 Man - Defense Electric Through The Wall Pipe

### 产品主要特点与用途 Characteristics And Use Of Products

人防的密闭作用如下:

一为固定防松动,与径更好的结合在一起;二为战时防毒气沿管壁或套管壁渗入防护区,所以密闭的材料,厚度,高度都有规范要求。

安装问题:主要是在地下室电气管道通过或进入人防室时,人防施工要求电气管道在分界处焊接密闭肋,起防爆作用。再就是进出地下室外墙电气管道,要么加装防水套管,电气管道穿真管进入地下室,要么在进入地下室的电气管道穿剪力墙处焊防水翼环,起防水作用。但是,以上二种情况的前提是,电气管道必须是钢管,定额中确实是没有套用于目,看看是否套用法兰焊接,定额材料换算处理。

## JSD型低频橡胶隔震器 JSD Low-frequency Rubber Vibration Isolator

### 产品介绍 Product Introduction

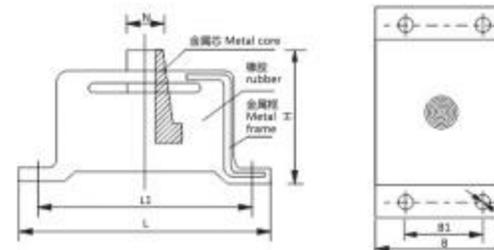

JSD型低频橡胶隔震器是由内、外钢套和中间的合成橡胶组成。经硫化呈中间圆锥体橡胶部分受剪切力，具有较大的变形范围和较低的固有频率。工作温度范围在-50~50℃温度变化时，刚度也有所变化；阻尼比C/CC>0.07.对于水泵、压缩机、通风机、发电机、冷冻机等机械设备的积极隔振和仪器仪表的消极隔振，都有良好的隔振效果。

JSD type low frequency rubber cutting vibration isolator is composed of internal and external steel and external steel bushing and medial synthetic rubber, after vulcanization, it appear a core in the middle and the rubber part is stressed, and there are large deformation ranges and low free-running frequency. The working temperature range is -50~+50℃, as the temperature changes, the rigidity changes, damping ratio is C/CC>0.07. It has good vibration isolating effect for the active vibration isolation of water pump, compressor, ventilator, generating set and refrigerating machine and the passive vibration isolation of instruments and meters.

## BE型橡胶隔震器 BE Type Rubber Vibration Isolator

### 产品主要特点与用途 Characteristics And Use Of Products

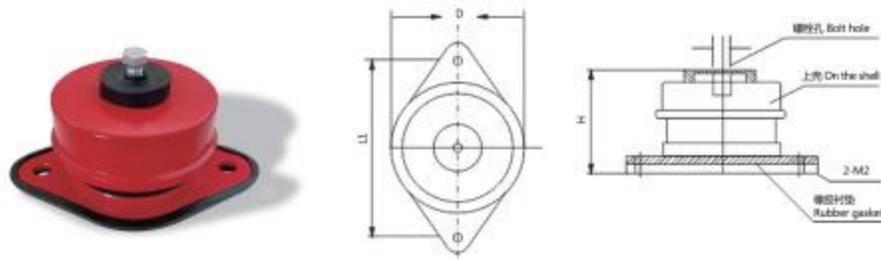

BE型橡胶隔震器有金属与橡胶复合制成。金属表面全部包裹橡胶，能防止金属锈蚀。产品具有耐油、耐海水、耐盐雾和日照等，能满足陆用、船用等各种环境条件，产品质量指标达到美国有关军用指标。BE型橡胶隔震器的固有频率低，阻尼比适宜，横向刚度高于纵向刚度，适用平置、倒置及侧挂等多种安装形式。平置使用时，横向稳定性好，当承受较大冲击时，可自动限位保护，同时对共振峰的抑制能力很强，对瞬态冲击响应时过度工况等引起的自激能迅速消失。设备不致出现任何晃动，该产品在较宽的干扰频率范围内有相当明显的隔振效果。能适用于各类陆地、船用机械设备，如柴油机、风机、水泵、空压机、空调机精密仪器仪表等中、小型机械设备的隔振，对有水平扰力的机械设备，使用本隔震器能取得良好的隔振效果。

BE rubber vibration isolator is made from metal and rubber compound, rubber wrap all the metal surface, to prevent metal corrosion. Products with oil, seawater, salt spray and sun shine, to meet the land use, marine and other environmental conditions, quality indicators have reached the United States military targets. BE rubber isolator natural frequency of the low damping ratio suitable lateral stiffness than vertical stiffness for level set, hanging up side-down and side installation of a variety of forms, flat home use, the lateral stability. When with stand greater impact, it can automatically limit protection, while the resonance peak of the system are strong, the instantaneous impulse response of the transient conditions caused by excessive vibration can quickly disappear from the device without any shaking, the product interference in a wide frequency range of vibration effects are quite obvious. Can be applied to all types of terrestrial, marine machinery and equipment, such as diesel engines, fans, pumps, air compressors, air conditioners, precision instruments, etc. small machinery and equipment is vibration. The level of interference power to have the machinery and equipment, use of the isolator can achieve good isolation effect.

## ZD型阻尼弹簧减震器 ZD Type Damping Spring Shock Absorber

### 产品介绍 Product Introduction

ZD型阻尼弹簧减震器具有弹簧减震器的低频率和橡胶减震器的大阻尼等双重优点。将两者的优点结合，消除了弹簧减震器共振时振幅激增的现象，又解决了橡胶减震器固有频率较高的难题，是积极、消极隔振的理想产品。ZD型阻尼减震器载荷范围广、适应性强，对积极隔振消极隔振和冲击隔振能同时产生明显效果，是一种多功能通用性隔振产品，适用于-20℃~80℃的工作环境，其正常工作载荷范围内固有频率在1.4HZ~4.9HZ之间，阻尼为0.065。是空调、恒置设备、风机、冷却塔、冷冻机组、压缩机、水泵等承载设备的理想减振产品。

ZD type damping spring shock absorber spring shock absorber of low frequency and large damping rubber shock absorber, such as double advantage, to combine the advantages of both, eliminates the spring damper resonance amplitude excitation phenomenon of increase, and solve the problem of the rubber shock absorber natural frequency is higher, is an ideal product to active and passive vibration isolation. ZD-type damping spring shock absorber wide load range, strong adaptability, the active vibration isolation, passive vibration isolation and shock isolation can also have obvious effect. It is a kind of multifunction isolation commonly used product, suitable for working environment -20°C to 80°C. Its inherent within the scope of normal working load between 1.4Hz frequency, damping ratio 0.065 is air conditioners, the motors, fan cooling towers, refrigeration units, compressor, water pump bearing equipment such as ideal damping products.

### 适用设备 Apply To Equipment

水泵、风机、冷水机组、落地式新风机、组合式空调机、柜式空调机、屋顶式空调机、离心风机。载荷范围：30-3300kg

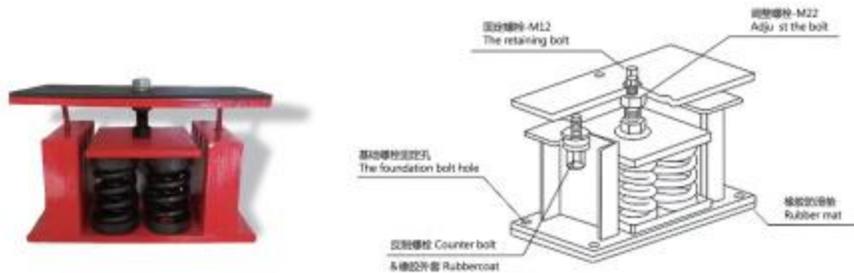

Water pump, fan, water chiller, floor type new fan, modular air conditioning units, cabinet air conditioner, roof type air conditioning units, centrifugal fan load range: 30-3300kg

## ZTF型可调阻尼式弹簧减震器 ZTF Adjustable Damping Type Spring Shock Absorbers

### 产品介绍 Product Introduction

ZTF型阻尼弹簧减震器是由多组弹簧组成，上下钢板及钢板外表面粘贴橡胶防滑垫等组成。ZTF型阻尼弹簧减震器，是我厂根据国外大型冷水机组、安装不平衡、动力设备低速、扰力较大而设计的产品。此产品具有安装灵活性大、稳定性好、固有频率低、隔振效果显著等特点。安装时可直接安放在设备上，若动力设备扰力较大，先调节重心，并将减震器底座固定孔用螺栓固定地基。

- 1、阻尼弹簧减震器(阻尼弹簧减震器)弹簧采用自然频率值设计，并经防腐及烤漆处理；耐候性佳；防振效率高。
- 2、壳体采用热浸镀锌工艺处理。
- 3、底部防滑及防侧倾螺栓设计，安全性高。
- 4、安装简单并可依实际需要调整高度及水平。
- 5、能消除机械结构震动，并保护及延长机械寿命。
- 6、荷重挠度25mm、40mm、50mm、75mm、100mm、125mm。

ZTF type damping spring shock absorber is composed of multiple sets of spring, steel plate and steel plate surface paste rubber mat, etc. ZTF type damping spring shock absorber, is my factory according to the large foreign water chillers, in stallation value, power equipment products in the design, the interference power is large or at low speed. This product has great installation flexibility, good stability and low natural frequency, vibration isolation effect is remarkable, etc. When in stallation, can be directly placed on the equipment, if the power equipment interference power is larger, first adjust the center of gravity, and fixed hole bolted the damper base foundation.

- 1, damping spring shock absorber damping spring damper spring design using natural frequency values, and the corrosion protection and treatment of the lacquer that bake, weather resistance. Vibration control effect is high.
- 2, adapt the hot dip galvanizing process.
- 3, at the bottom of the anti-skid and anti-roll bolt design, high safety.
- 4, in stallation is simple and can be in accordance with the actual need to adjust the height and level.
- 5, can eliminate the mechanical structure vibration, and to protect and extend the life of the machine.
- 6, 25mm load deflection, and 40 mm, 50 mm and 75 mm, 100 mm and 125 mm.

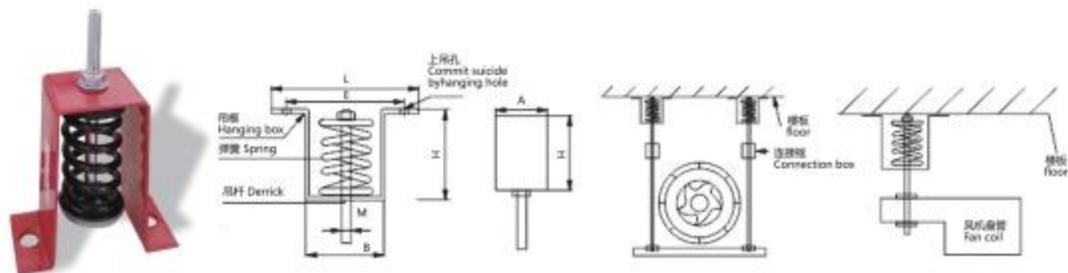

### 阻尼弹簧减震器(阻尼弹簧减震器)主要用途 Damping Spring (Shock Absorber Damping Spring) Shock Absorber Main Purpose

- 1、各类重型机械 2、冷水机组、冷却塔 3、消防水泵、各种风机 4、发电机、空气压缩机
- 1, all kinds of heavy machinery water chillers, cooling water tower 3, fire pump, all kinds of fan 4, generator, air compressor

## HV型阻尼弹簧吊式减震器 Damping Spring Suspension Shock Absorber

### 产品介绍 Product Introduction

为了满足用户的需求,我公司在生产多种吊式减震器的基础上,设计制造了HV型吊架减震器,该产品是一种以减振弹簧、橡胶复合垫、阻尼等组成的预应力吊架减震器。应用范围非常广泛。

风机、管道、动力设备的吊装隔振降噪,也可用于精密仪表的吊装等等。荷载范围:10-1000Kg

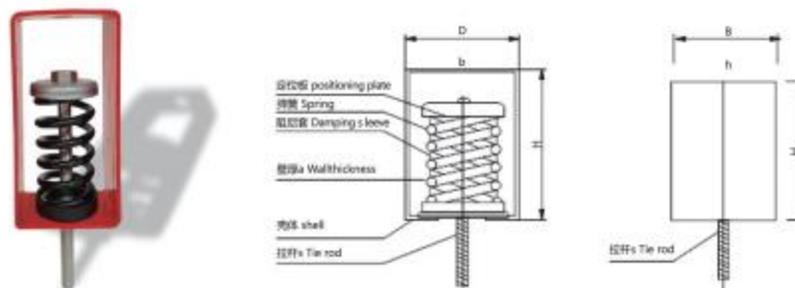

In order to meet the needs of different users,my company in the production of a variety of hanging type shock absorber,on the basis of design and manufacture of the HV type suspension shock absorber,this product is a kind of damping spring,rubber compound gasket prestressed suspension shock absorber,damping,etc.Application scope is very broad.

Fan,pipelines,power equipment hoisting vibration isolation of noise reduction can also be used for precision instrument assembly,and soon load range 10-1000kg

## ZTY型吊式弹簧减震器 ZTY Type Hanging Spring Shock Absorbers

### 产品介绍 Product Introduction

ZTY型吊式弹簧减震器应用非常广泛是吊装设备首选弹簧减震器,该产品具有阻尼大,自振率低,安装方便,对消除固体传声有明显的效果,适用于各种大小设备及管道系统的吊式安装。

ZTY series hanging type damper applications very extensive, spring shock absorber was the preferred hoisting equipment. The product has the big damping force, natural vibration frequency is low, easy installation, have apparent effect to eliminate solid voice, comfortable. Used for various size ceiling installation of equipment and pipeline system.

### 适用设备 Apply to Equipment

吊顶式空调器,轴流风机,新风机,风管等各种吊装设备。荷载范围:5-1000Kg

Condole type air-conditioner, axial flow fan, new fan, pipelines and other lifting equipment. Load range 5-1000kg

### ZTY型吊架减震器性能参数 Suspension Shock Absorber Performance Parameters

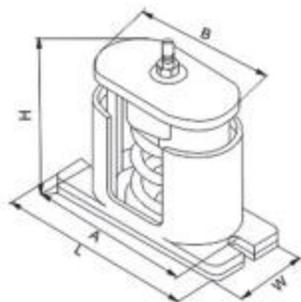

型号 Type	荷载范围 The load range Kg	自报频率 Self-reported frequency Hz	H(mm)	D(mm)	B(mm)	b(mm)	s(mm)	a(mm)
ZTY-1	5-15	3.5-2.9	80	60	35	8.5	8	3
ZTY-2	15-25	3.5-2.9	118	63	40	8.5	8	3
ZTY-3	25-45	3.4-2.7	120	70	45	10.5	10	3
ZTY-4	45-75	3.2-2.5	130	70	50	10.5	10	3

ZTY-9	240-295	2.7-2.1	180	100	80	17	16	4

注:吊杆长度可按客户要求定做,吊环和连接螺母可选配

Note: the boom length can be customized according to customer requirements, ring and coupling nut is optional

## JB型低频可调阻尼弹簧减震器

### JB Type Low Frequency Adjustable Shock Absorber Damping Spring

#### 产品介绍 Product Introduction

JB型阻尼弹簧减震器特性：本体材质分为普通铸铁和球墨铸铁，本体经热镀锌处理，耐候性好，特殊结构设计，可依实际需要调整高度。外形轻巧坚固，安装容易，适用于各类机械内减震装置。弹簧均经热处理、ED防锈、喷漆等程序处理。荷重挠度20mm、40mm能有效消除机械振动。底部止滑橡胶，安装容易及安全、控制及调整水平容易，能有效消除地板震动，价格也比较便宜。

阻尼弹簧减震器主要用途：JB型阻尼弹簧减震器适用于各种冷水机组、冷却塔、落地风机或落地空调箱等设备。

阻尼弹簧减震器安装说明：阻尼弹簧减震器安装前，请先确认减震器的型号规格型号是否正确。减震器压缩量一般为10-25mm之间。减震器安放于正确位置后，需先取下固定螺栓，再将设备的固定螺栓安装在减震器上，并以固定。先以基础螺栓固定减震器，调整减震器高度须使设备水平。调整螺母，以顺时针方向向上，逆时针方向向下，水平调好后，再配接管路。

机器或水塔旁连接管路，如因增设悬空管道的关系，而增加减震器负荷，须另设XDD型管道减震器，以免造成减震器负荷不足。

JB type spring shock absorber damping characteristics:ontology can be divided into ordinary cast iron and nodular cast iron material,ontology by the hot dip galvanized processing,weather resistance,special structural design,can be in accordance with the actual need to adjust the height.Compact in solid,easy to install,suitable for all kinds of mechanical vibration reduction device.Spring after heat treatment,ED rust and paint process Load deflection 20 mm,40 mm can effectively eliminate the mechanical structure vibration.Side at the bottom of the rubber,easy installation and high safety,easy to control and adjust at the level floor vibration,can effectively eliminate the price also cheaper

Damping spring shock absorber main use:JB type damping spring vibration(shock) is suitable for various water chillers ,cooling towers,fan or air conditioning box equipment such as landing

Damping spring shock absorber damping spring damper installation instructions:before installation,please make sure the shock absorber model specifications are correct.Amount of damper compression is usually between 10 to 25 mm Shock absorber put in right location,need to remove the retaining bolt first,then install the equipment fixed resting on the shock absorber,and fixed.Start with the foundation bolt of shock absorber Adjusting the damper height shall make the equipment level.The adjusting nut to clockwise direction of the needle upward,downward counterclockwise,level set,match again to take over the road

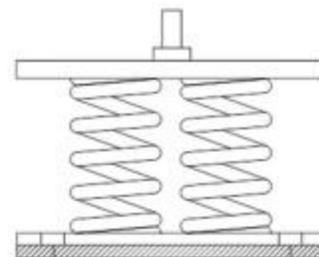

Connecting line beside a machine or a water tower,such as by adding suspended end pipe,the relationship between load and increase the shock absorber,is an other set XDD type pipe shock absorber,avoid to cause shock load.

## ZGT型阻尼弹簧减振（震）器

### ZGT Damping Spring Vibration/shock

#### 产品介绍 Product Introduction

ZGT-D型可调式低频阻尼弹簧减震器，是我厂根据国外大型冷水机组、安装不平衡、动力设备低速、扰力较大而设计的产品。此产品具有安装灵活性大、稳定性好、固有频率低、隔振效果显著等特点。安装时可直接放在设备下，若动力设备扰力较大，先调节重心，并将减震器底座固定孔用螺栓固定地基。

适用设备：冷水机组、柴油发电机组等大型设备。

注：可根据客户的具体要求，设计制作。载荷范围 300-6500kg 垂直自然频率为2.3Hz-4.9Hz。

ZGT-D type adjustable frequency damping spring shock absorber, is my factory according to the large foreign water chillers, imbalance of installation and power equipment products in the design, the interference power is larger at low speed, this product has great installation flexibility, good stability and low natural frequency, vibration isolation effect is remarkable, etc. Installation can be directly placed on equipment, if power equipment interference power is larger, to adjust the center of gravity, and fixed hole bolted the damper base foundation. Applicable equipment: water chiller, diesel generating sets and other large equipment

Note: according to the customer's specific requirements, design and production. Load range 300-300 kg of vertical natural vibration frequency of 2.3 Hz to 4.9 Hz
